15:20-15:40	Discussion, questions and answers	Ad van Berlo
15:40-15.45	Wrap up and next steps	Ad van Berlo

What we want to achieve with the workshops is the following:

Informing end-users (the older adults, people with a chronic illness or condition), housing and care providers (care organisations, welfare, housing corporations) and policy makers of municipalities or health insurers about the existence and (potential) usage of open service platforms.

Identify the wishes and needs of the stakeholders to further use open service platforms.

Hearing of success factors and lessons learned from stakeholders so that they can also be applied in the further development of open service platforms.
